

Stat159 Project 3: Add a title

Liang Hao, Bret Hart, Andrew Shibata, Gary Nguyen

December 3, 2016

1 Method

In this section, we will talk about how we decide on the criteria for high-quality, low-cost education for minority students.

One of the most common reasons students cite in choosing to go to college is the expansion of employment opportunities. To that end, data on the earnings and employment prospects of former students can provide key information. To measure the labor market outcomes of individual attending institutions of higher education, data on cohorts of federally aided students were linked with earnings data from de-identified tax records and reported back at the aggregate, institutional level.
